OBJECTIVES

I am a highly motivated and academically driven student currently pursuing a Bachelor of Science in Physics at Jahangirnagar University, Dhaka. With a strong academic foundation and a deep passion for scientific exploration, I have consistently demonstrated excellence in analytical thinking, problem-solving, and research-oriented learning. My studies have strengthened my understanding of fundamental and advanced concepts in physics while fostering a keen interest in scientific research and innovation.

Through my undergraduate education, I aim to build a solid research background and develop the technical and critical thinking skills necessary to address complex scientific challenges. Upon completing my bachelor's degree with strong academic performance and meaningful research experience, I aspire to pursue higher studies and advanced research opportunities abroad in cutting-edge areas of physics. My long-term goal is to contribute to the advancement of scientific knowledge through impactful research and innovation while addressing global challenges through the application of modern physics.

EDUCATION

Bachelor of Science (Honors) in Physics *March. 2026 – Present*
Jahangirnagar University, Savar, Dhaka, Bangladesh. Web: juniv.edu/departments/phy/program/bscPhysics

Higher Secondary Certificate (HSC) Examination – 2024, Major: Science *Jan. 2023 – Oct. 2024*
Pabna Govt. Women's College, Pabna, Bangladesh; Board: **Rajshahi**
GPA: **5.00/5.00**, Grade: **A+**, Avg. Marks in Higher Mathematics, Physics, and Chemistry: **93.83%**

Secondary School Certificate (SSC) Examination – 2022, Major: Science *Jan. 2017 - Nov. 2022*
Dhobakhola Coronation High School, Natiabari, Pabna, Bangladesh; Board: **Rajshahi**
GPA: **5.00/5.00**, Grade: **A+**, Avg. Marks in Mathematics, Higher Mathematics, Physics, and Chemistry: **98.25%**

SKILLS SUMMARY

- **Programming Language:** C programming
- **Markup Language:** HTML (Hyper Text Markup Language)
- **Core Concepts:** Flowchart and Algorithm
- **Basic Skills:** Self-motivated, Time Management, Critical Thinking, Teamwork, Adaptability, Leadership

LIST OF COMPLETED COURSEWORK

- HSC: Higher Mathematics, Physics, Chemistry, Biology, Information and Communication Technology, English, Bengali
- SSC: Mathematics, Higher Mathematics, Physics, Chemistry, Biology, Information and Communication Technology, English, Bengali, Bangladesh and Global Studies, Hindu Religion and Moral Education, Career Education

HIGHLIGHTING IMPORTANT CONTENT OF KEY COURSES STUDIED

- **PHYSICS:** The Physics 1st Paper covers: Vectors, linear motion, two-dimensional motion, laws of motion, laws of rotational motion, work, power and energy, gravitation, simple harmonic motion, elasticity, fluids, heat and gas, temperature, first law of thermodynamics, heat radiation, change of state, second law of thermodynamics, wave and sound, velocity of sound. The Physics 2nd Paper covers: electrostatics, the flow of electricity and electric circuits, the thermal and chemical effects of current, the magnetic effects of current, electromagnetic induction and alternating current, electromagnetic waves, reflection of light, refraction of light, optical instruments, wave theory of light, electron and photon, atom, electronics, theory of relativity and astrophysics.
- **MATHEMATICS AND HIGHER MATHEMATICS:** The mathematics course includes: set theory, functions and relations, quadratic equations, matrices and determinants, permutation and combination, binomial theorem, vector algebra, coordinate geometry, trigonometry, and basic calculus including differentiation and integration. Higher Mathematics extends these foundations with advanced topics such as mathematical logic, complex numbers, polynomial equations, inequalities, sequences and series, advanced calculus of integrals and derivatives, differential equations, and applications of calculus to geometry and mechanics. The curriculum emphasizes theoretical understanding along with practical problem-solving, preparing students for science, engineering, and technical fields.

- **ENGLISH:** The English 1st Paper covers multiple-choice questions, short-answer questions, information transfer or flowcharts, summary writing, close tests with clues, close tests without clues, rearranging, graph or chart writing, story writing, and informal letters. The English 2nd Paper focuses on grammar and writing skills, including the use of prepositions, special phrases or words, completing sentences using clauses and phrases, the right form of verbs, narrative style, use of modifiers, sentence connectors, synonyms and antonyms, punctuation, formal letter or email writing, essay writing, and two types of paragraph writing, one by listing or description and the other by comparison and contrast or cause and effect.
- **CHEMISTRY:** The Chemistry 1st Paper syllabus includes a comprehensive foundation in fundamental concepts of inorganic and physical chemistry: atomic structure and the periodic table, covering periodic properties and chemical bonding. It continues through the states of matter, gas laws, and the principles of solutions and colloids. The syllabus further covered chemical reactions and stoichiometry, thermodynamics, chemical equilibrium, and the behavior of acids, bases, and salts. Advanced chapters include electrochemistry and redox reactions, principles of oxidation and reduction, properties of hydrogen, water, and hydrogen peroxide, the periodic classification of elements, and detailed studies on the s- and p-block elements, including their characteristics and compounds. The Chemistry 2nd paper includes key areas of advanced inorganic and physical chemistry. It begins with environmental chemistry, highlighting pollution and its impact, and proceeds to the periodic classification of elements, discussing the properties and trends of s-, p-, d-, and f-block elements. The syllabus explores chemical bonding, reaction kinetics, and dynamic chemical equilibrium, including acid-base and solubility equilibria. It also explored thermochemistry, examining heat changes in chemical processes, and electrochemistry, covering redox reactions, electrochemical cells, and electrolysis. The curriculum concludes with nuclear chemistry, discussing radioactivity and nuclear reactions.
- **INFORMATION AND COMMUNICATION TECHNOLOGY:** World and Bangladesh Perspective, Communication Systems and Networking, Number Systems and Digital Devices, Introduction to Web Design and HTML, C Programming Language, and Database Management System.

ACADEMIC HONORS AND AWARDS

- **Cracked GST (General, Science & Technology) Admission Test 2026:** Successfully passed the GST (A Unit/Science) admission test and got a chance with merit in the Electrical and Electronic Engineering department of Jamalpur Science and Technology University, Bangladesh. [June 2026]
- **Performance in Competitive Exam:** Ranked 109th in the 4th shift of the highly competitive admission test for studying Bachelor of Science at the Faculty of Mathematical and Physical Sciences of Jahangirnagar University, which is one of the top public universities in Bangladesh. [March 2026]
- **Best Grades:** Received highest academic grades in S.S.C. and H.S.C. level final exam (2022 and 2024).
- **Scholarship:** General Grade Scholarship in Primary School Certificate (PSC) Exam in Bangladesh (2016).

VOLUNTARY ACTIVITIES AND EXTRACURRICULAR ACTIVITIES

- **Community Services:** Engaged in volunteering activities to help the community, such as organizing clean-up in local communities, collecting donations to charities, road-side tree planting, blood donation, and assisting local organizations.
- **Student Organization:** Participated in school events, organize activities, and contribute to the school's community
